

Understanding Crop Plan Statuses

Field Plan Status is a label within AgroDoc.NET that allows the builder of the Crop Plan to attach a status note to the Crop Plan. The status note defines each Crop Plan's status relative to the agronomy sales process. There are currently three levels of Crop Plan Status: 1) Accepted, 2) Current, 3) Alternate

Crop Plan Status – Accepted: Indicates that the Field Plan has been accepted by the grower, indicating a higher level of 'buy in' than Current.

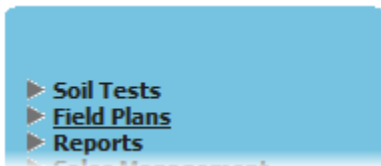

Crop Plan Status – Current: Indicates a Field Plan that is being built, discussed, presented, and/or proposed.

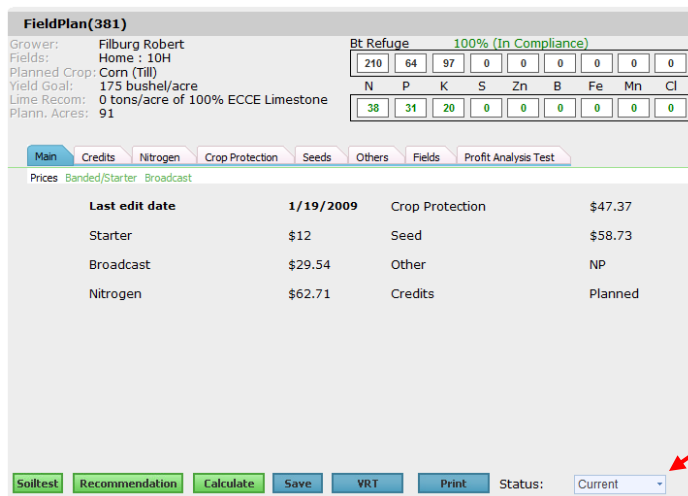

Crop Plan Status – Alternate: Indicates a Field Plan that is a being proposed as another option.

Setting Crop Plan Status

1. To set your Field Plan status, click on **Crop Plan**

2. Select a **Grower** by clicking on the → button
3. Select a **Crop Plan** by clicking on the → button
4. The Crop Plan Status can be found in the bottom right corner of the Crop Plan. You can change the status by selecting the appropriate status within the drop down list.

FieldPlan(381)

Grower: Filburg Robert
 Fields: Home : 10H
 Planned Crop: Corn (Till)
 Yield Goal: 175 bushel/acre
 Lime Recom: 0 tons/acre of 100% ECCE Limestone
 Plann. Acres: 91

Bt Refuge: 100% (In Compliance)
