

Procedures to Set-Up A Default Service

Default service charges can be set for each subcategory of custom application.

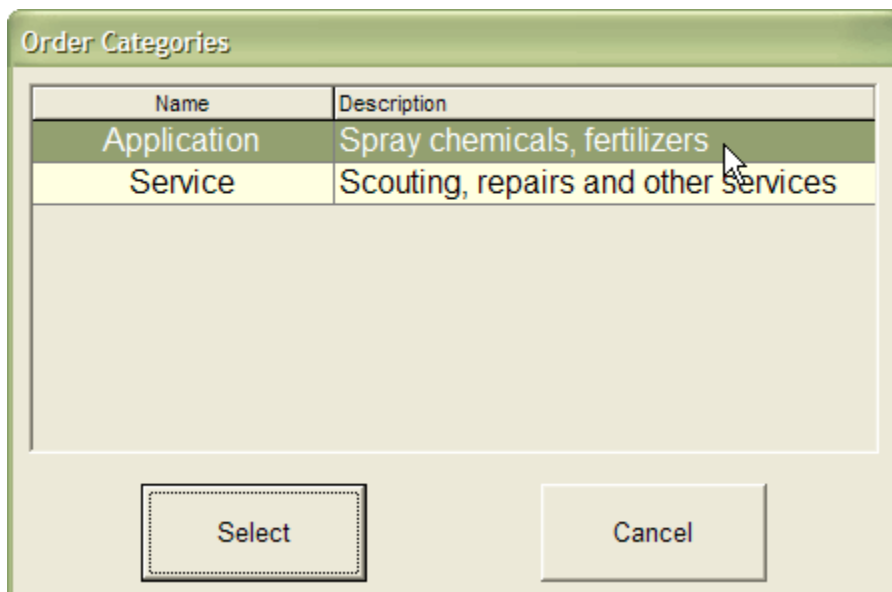

1.) Open DeliveryDoc

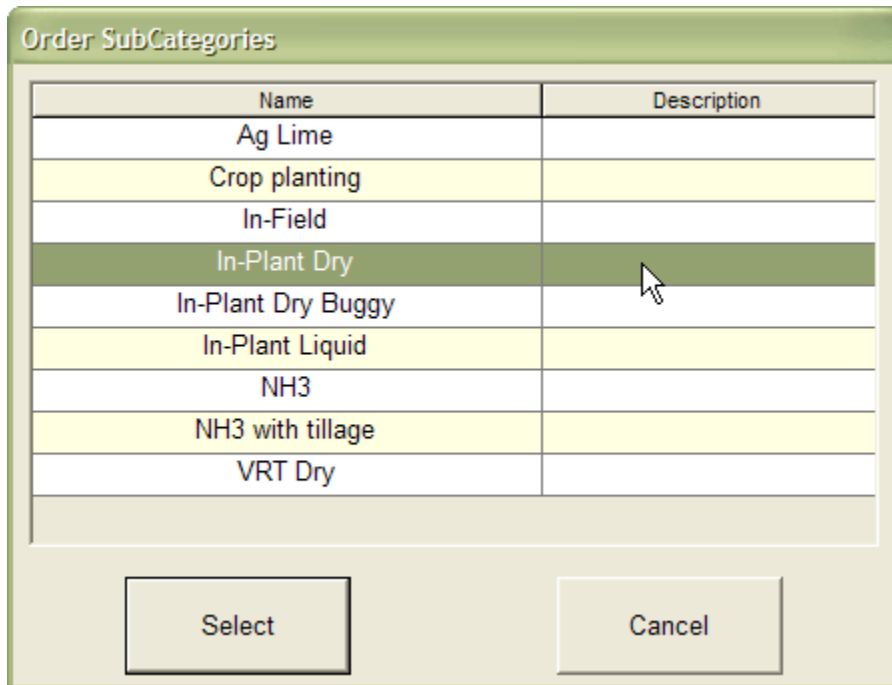

2.) Navigate to the following: TOOLS > EDIT ORDER SERVICE

3.) Select an Application

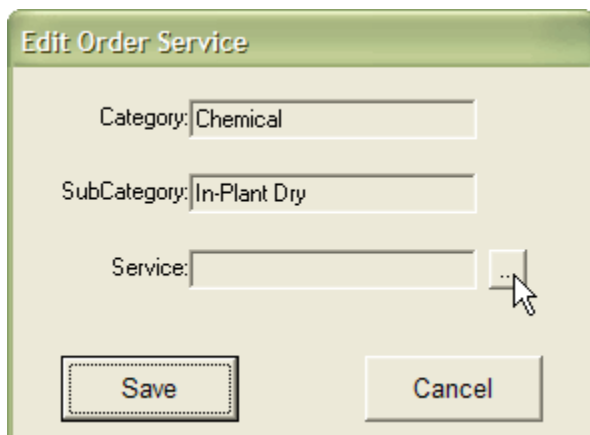

4.) Select an Application Subcategory

The dialog box titled "Order SubCategories" contains a table with two columns: "Name" and "Description". The table lists several application subcategories, with "In-Plant Dry" highlighted in a dark green color. A mouse cursor is positioned over the "In-Plant Dry" row. Below the table are two buttons: "Select" and "Cancel".

Name	Description
Ag Lime	
Crop planting	
In-Field	
In-Plant Dry	
In-Plant Dry Buggy	
In-Plant Liquid	
NH3	
NH3 with tillage	
VRT Dry	

5.) This window will appear. Select the "... " button next to Service to proceed.

The dialog box titled "Edit Order Service" contains three text input fields. The first field is labeled "Category:" and contains the text "Chemical". The second field is labeled "SubCategory:" and contains the text "In-Plant Dry". The third field is labeled "Service:" and is empty. To the right of the "Service:" field is a small square button with three dots "...". A mouse cursor is pointing at this button. Below the input fields are two buttons: "Save" and "Cancel".

6.) Select default Service that you would like to add to the Application

ID	Name	PackSize	Category	SubCategory	On Hand
